

Dear Hiring Manager

Dear Hiring Manager,

Dear Hiring Manager,

I am excited to apply for the Full-Stack Developer position at Snoonu, where my passion for software engineering and innovative problem-solving aligns perfectly with the company's mission to transform daily life through cutting-edge technology.

With three years of experience as a Full-Stack Developer, I have successfully delivered a range of dynamic applications and tools, including AI-powered web applications and crypto Web3 applications. My technical expertise in languages like JavaScript, TypeScript, and frameworks such as React.js and Next.js, alongside my experience with state management libraries like Recoil and frontend testing frameworks like Jest, positions me as a strong candidate for this role.

At Dads Agree Michigan, I achieved significant reductions in content deployment times and ensured seamless financial acquisition services through robust JavaScript implementations. Additionally, my work on side projects such as Discord bot development and automation scripts has honed my ability to integrate various technologies to create user-friendly experiences. These experiences not only align with Snoonu's commitment to excellence but also showcase my dedication to delivering impactful results.

I am particularly drawn to Snoonu's vision of becoming Qatar's leading super app and driving innovation in the region. I am enthusiastic about contributing to the development of Snoonu's ecosystem and believe that my background in both client and server-side development, along with my proactive approach to learning and adapting, will enable me to excel in this role.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills align with Snoonu's goals and contribute to the company's ongoing success.

Sincerely, Mohd Hasnain

Sincerely,
