PROFESSIONAL SUMMARY

Fullstack developer who ships fast and ships clean. Built 5+ production apps from zero to deployed - REST APIs, real-time systems, payment integrations, and automation workflows. Comfortable owning end-to-end delivery, integrating APIs and data sources, and iterating based on real-world feedback. Looking for a forward deployed role where I can build tailored solutions for customers and ship AI-powered tools into production.

CORE COMPETENCIES

Fullstack Development

REST API Integration

AI & Automation

End-to-End Delivery

Customer-Facing Engineering

JavaScript / Python

Docker & CI/CD

Rapid Prototyping

WORK EXPERIENCE

Freelance / Contract

Aug 2024 - Present

Fullstack Developer

- Built and shipped 5+ fullstack web apps from scratch - auth (JWT/OAuth), payment gateway integration (Stripe API), real-time features via WebSockets, and API-first architectures handling 10K+ daily requests
- Architected RESTful APIs with external API integrations, webhook callbacks, and third-party data sync - working directly with clients to translate requirements into shipped features
- Owned end-to-end delivery for each project: discovery, prototyping, build, deployment, and iteration based on real user feedback
- Dockerized applications with CI/CD pipelines (GitHub Actions) for automated builds, testing, and deployment
- Collaborated remotely with clients across 3 timezones, leading technical discussions and delivering every sprint on time

Previous Role (Contract)

Jun 2023 - Jul 2024

Junior Fullstack Developer

- Developed and maintained internal tooling for a SaaS product (React + Node.js), owned builds from concept to production
- Cut API response times by 40% with caching strategies and query optimization - directly improving customer experience
- Wrote unit + integration tests that caught bugs before staging, ensuring reliable deployments
- Set up GitHub Actions CI/CD - automated builds, linting, and deployments

PROJECTS

Marketplace API Platform

Full-featured marketplace backend with JWT auth, product CRUD, order management, Stripe payment gateway integration, and real-time notifications via WebSockets. Containerized with Docker. Stress-tested to handle 500 concurrent users.

Node.js, Express, PostgreSQL, Redis, Docker, Stripe API

Real-Time Chat Application

WebSocket-powered chat with typing indicators, read receipts, file sharing, and message persistence. Deployed with PM2 and Nginx. Hit <50ms message latency under load.

React, Socket.io, MongoDB, Docker, Nginx

Inventory Management Dashboard

Admin dashboard for stock tracking, reports, supplier management. Role-based access control, charts, CSV export.

Next.js, Tailwind CSS, PostgreSQL, Prisma

URL Shortener with Analytics

Bitly clone with custom aliases, click tracking, geolocation analytics, and rate limiting. Cached hot URLs in Redis. Handles 1K+ daily redirects on a \$5 VPS.

Express, Redis, MongoDB, EJS

EDUCATION

BSCS in Computer Science - [University of Swabi](#)

Expected 2026

Data Structures, Algorithms, Databases, Operating Systems, Computer Networks, Software Engineering

SKILLS

Languages: JavaScript/TypeScript, Python, SQL, HTML/CSS **Frontend:** React, Next.js, Tailwind CSS, Redux

Backend: Node.js, Express, REST APIs, WebSockets, JWT/OAuth **Database:** PostgreSQL, MongoDB, Redis, Prisma ORM

DevOps: Docker, Linux, Nginx, PM2, GitHub Actions CI/CD **Tools:** Git, Postman, Stripe API, Webhooks
