PROFESSIONAL SUMMARY

Fullstack engineer who takes features from whiteboard to production. Built and shipped 5+ web apps end-to-end - authentication, APIs, databases, deployment, monitoring. Combines strong technical fundamentals (React, Node.js, PostgreSQL, Docker) with a product-minded approach: I ask why before I build how. Experienced in remote collaboration across timezones, delivering iteratively, and owning the full lifecycle. Currently completing a BSCS at University of Swabi with production experience that started well before graduation.

CORE COMPETENCIES

Fullstack Development

React & Next.js

Node.js & Express

PostgreSQL & MongoDB

REST API Design

Docker & CI/CD

Redis & Caching

WebSockets

Git & Linux

EXPERIENCE

TechVista Solutions

Jun 2024 - Present

Fullstack Developer (Remote) - Lahore, Pakistan

- Built and shipped 3 fullstack modules for a B2B SaaS product serving 500+ concurrent users - from schema design through API implementation to React frontend and Docker deployment
- Architected RESTful APIs handling 10K+ daily requests with sub-200ms response times using Node.js, Express, and PostgreSQL with proper indexing and caching via Redis
- Reduced API response times by 40% by analyzing slow queries, adding composite indexes, and implementing a multi-layer Redis caching strategy
- Set up CI/CD pipelines with GitHub Actions for automated builds, linting, and deployments - enabling multiple weekly releases with zero downtime
- Collaborated with cross-functional teams across 3 timezones, delivering all sprints on time through async communication and clear status reporting

Netsoul Technologies

Sep 2023 - May 2024

Junior Fullstack Developer (Remote) - Islamabad, Pakistan

- Developed and maintained internal tools and customer-facing features for a SaaS platform using React, Node.js, and PostgreSQL
- Built a role-based access control system with JWT authentication, supporting admin, manager, and viewer permission levels
- Wrote unit and integration tests (Jest, Supertest) that caught regressions before staging - reducing production bugs by 30%
- Containerized development environments with Docker Compose, cutting new developer setup time from 2 days to 2 hours

DevCraft Karachi

Mar 2023 - Aug 2023

Junior Developer (Contract) - Karachi, Pakistan

- Built a real-time dashboard with live data updates via WebSockets, serving operational metrics to a team of 20+ users
- Implemented CSV export, chart rendering, and dark-mode UI using React, Tailwind CSS, and Chart.js
- Wrote PostgreSQL queries and migrations for a multi-tenant inventory system with 20+ database tables

PROJECTS

Marketplace API Platform

Full-featured marketplace backend with JWT auth, product CRUD, order management, Stripe payment integration, and real-time WebSocket notifications. Designed a 12-table PostgreSQL schema with proper indexing for multi-tenant data isolation. Containerized with Docker. Stress-tested to 500 concurrent users with sub-200ms response times.

React, Node.js, Express, PostgreSQL, Redis, Docker, Stripe

Real-Time Chat Application

WebSocket-powered chat with typing indicators, read receipts, file sharing, and message persistence. Deployed on VPS with PM2 and Nginx reverse proxy. Hit sub-50ms message latency under load.

React, Socket.io, MongoDB, Docker, Nginx

Inventory Management Dashboard

Admin dashboard for stock tracking, report generation, and supplier management. Role-based access control, data export, and dark mode. Designed for non-technical users - managers could generate reports without SQL.

Next.js, Tailwind CSS, PostgreSQL, Prisma

EDUCATION

BSCS in Computer Science

Expected 2026

University of Swabi

Coursework: Data Structures, Algorithms, Databases, Operating Systems, Computer Networks, Software Engineering

SKILLS

Languages: JavaScript/TypeScript, Python, SQL, HTML/CSS **Frontend:** React, Next.js, Tailwind CSS, Redux, Shadcn/ui
Backend: Node.js, Express, REST APIs, WebSockets, JWT/OAuth **Database:** PostgreSQL, MongoDB, Redis, Prisma ORM
DevOps: Docker, Linux, Nginx, PM2, GitHub Actions CI/CD **Tools:** Git, VS Code, Postman, Figma (basic)
