PROFESSIONAL SUMMARY

Fullstack developer who ships fast and ships clean. Built 5+ production apps from scratch - auth, payments, real-time features, APIs - with Dockerized CI/CD and PostgreSQL under the hood. Equally comfortable debugging production issues and talking to customers. Looking for a team where I can level up and ship real product, bringing the same customer-obsessed, detail-oriented approach that turns support tickets into product improvements.

CORE COMPETENCIES

Technical Support & Troubleshooting

API Design & Integration

RESTful APIs & Webhooks

PostgreSQL & SQL

Docker & CI/CD

Customer-Facing Communication

JavaScript / Node.js

SaaS Platform Development

WORK EXPERIENCE

Freelance / Contract Aug 2024 - Present

Fullstack Developer

- Built and shipped 5+ fullstack web apps from scratch - auth via JWT/OAuth, payment gateway integration (Stripe), real-time features via WebSockets, and API-first architectures handling 10K+ daily requests
- Architected RESTful APIs with <200ms response times, including webhook integrations and third-party API connections for payment processing and external data sync
- Dockerized applications with CI/CD pipelines (GitHub Actions) for automated builds, linting, and deployment - ensuring reliable, reproducible releases
- Managed PostgreSQL databases with proper indexing, query optimization, and migration strategies - cut API response times by 40% through caching and query tuning
- Collaborated remotely with clients across 3 timezones, translating technical requirements into delivered features every sprint

Previous Role (Contract) Jun 2023 - Jul 2024

Junior Fullstack Developer

- Developed and maintained internal tooling for a SaaS product (React + Node.js stack), supporting customer workflows and internal operations
- Debugged production issues using logs and metrics, triaging root causes and driving fixes to resolution
- Wrote unit + integration tests that caught bugs before staging, contributing to platform reliability
- Set up GitHub Actions CI/CD - automated builds, linting, and deployments for consistent delivery

PROJECTS

Marketplace API Platform

Full-featured marketplace backend with JWT auth, product CRUD, order management, Stripe payment gateway integration, and real-time notifications via WebSockets. Containerized with Docker. Stress-tested to handle 500 concurrent users with sub-200ms API responses.

Node.js, Express, PostgreSQL, Redis, Docker, Stripe API

Real-Time Chat Application

WebSocket-powered chat app with typing indicators, read receipts, file sharing, and message persistence. Deployed on VPS with PM2 and Nginx reverse proxy. Hit <50ms message latency under load.

React, Socket.io, MongoDB, Docker, Nginx

Inventory Management Dashboard

Admin dashboard for tracking stock, generating reports, and managing suppliers. Built with charts, CSV export, role-based access control, and dark mode.

Next.js, Tailwind CSS, PostgreSQL, Prisma

URL Shortener with Analytics

Bitly clone with custom aliases, click tracking, geolocation analytics, and rate limiting. Cached hot URLs in Redis for sub-10ms redirects. Handles 1K+ daily redirects.

Express, Redis, MongoDB, EJS

EDUCATION

BSCS in Computer Science - University of Swabi

Expected 2026

Data Structures, Algorithms, Databases, Operating Systems, Computer Networks, Software Engineering

SKILLS

Languages: JavaScript/TypeScript, Python, SQL, HTML/CSS **Frontend:** React, Next.js, Tailwind CSS, Redux

Backend: Node.js, Express, REST APIs, WebSockets, JWT/OAuth **Database:** PostgreSQL, MongoDB, Redis, Prisma ORM

DevOps: Docker, Linux, Nginx, PM2, GitHub Actions CI/CD **Tools:** Git, Postman, Datadog (debugging), Stripe API
